

GENDER EQUALITY

I always wonders why despite some changes progress and development in gender equality, we as a society still hold narrow views towards anyone who is not a cis- het man?

We are brought up with several ideas about gender identity, the " appropriate" way of performing gender rules about who we can love.

We need a drastic mindset shift in our society and this can be done through gender sensitization. Gender sensitization can help root out negative attitude about gender and sexuality. It can take weeks, months, or years to unlearn some beliefs truly! But it is the only way for a society to collectively and genuinely favour gender equality.
