

" Inspiring the passion for Learning"

Motivation and inspiration are two simple words but can change anyone's life, whether he is a student or a normal fellow.

I am a teacher and I always do everything to bring my students into self motivation mode which I think should be done. Some students will have a drive from inside to learn new things and explore new ideas while some others look into successful persons around them and get self motivated to learn hard.

However, this is not the case for all students and many of them will need immense motivation and inspiration from teacher and parents to work hard.

Stories are always a favorite area for students that invoke their love and interest. This is one of the reasons why teachers use this as a tool to motivate them in many areas. This includes many common folk stories with a good moral at the end, real life examples of successful persons and simple stories of normal people who have been part of their life journey.

Finally story telling has characteristics that benefits the three main types of learning visual, auditory and kinesthetic , visual learners- benefits from the mental pictures that stories evoke.

Auditory learners are able to focus on the words and voice after story teller and kinesthetic learners can retain the emotional connections that they feel were created in the story.

I think

" The Best Success stories after begin with failure. Failure is an inescapable part of life and a critically important part of any successful life". This we can say if students understand this thing then they will not be afraid of failure.
